Building Innovative Leadership Through Social Entrepreneurship As A Solution to Social Problem

Laily Rahmah

Faculty of Psychology, Sultan Agung Islamic University (UNISSULA) Semarang

Social problem arise from lack of human or social groups rooted in economic factor, biological,biopsychological and culture. Each of these factors led to emergence of certain kinds of social problem such as unemployment, poverty, free sex, neurological disease, divorce, juvenile delinquency . Various types of social problems can have negative impact of people's live. Therefore,efforts to solve problems. The method used can be preventive or repressive. One of the repressive methods that can be done is to develop innovative leadership through social entrepreneurship.

Countries that still have a lot of social problem such as Indonesia needs an innovative leader who can create innovative work that implied a smart and creative solution to social problems. A Social entrepreneur is the one who practical social entrepreneurship able to see opportunities problem to find solution by applying the principle of entrepreneurship. They are the ones who have soul of leadership and high awareness of social problem. They have a strong desire to participate directly to solve the social problem, either individually or group. Social Entrepreneur generally the ones who have the leadership skills to myriad of creative ideas that can generate innovative solution

This article will discuss the relationship between innovative leadership and social entrepreneurshp. Conceptualization of the two variables will help the process of social problems. In this article will be completed with an analysisof cases from social entrepreneurship practices that have been done primarily by young intellectul.Various touch of good innovation in processes, methods, strategic and mindset that they tuck in their solution.
